To whom it may concern

Re: S R NEWMAN CONTRACTORS LTD

The above company, S R Newman (Contractors) Ltd have successfully won the tender for Guildford Borough Council's 'Annual Maintenance Contract for Minor Civil Engineering Works' for more than twenty years.

This contract is retendered every three years and is a schedule of rates for works which include new build as well as maintenance of existing structures. It's current value is approximately £400k per year. Typical examples of works are, drainage, surfacing, working with tarmac and block paving, brickwork structures, concrete structures, kerbing and road construction.

Their performance and workmanship have always been satisfactory and we continue to have a very good working relationship with them.

Yours faithfully

Roy N R de Coverly
Senior Engineer
